

The invention is a six-card-stud poker game, played with at least one but preferably one standard poker deck of 52 cards plus at least one but preferably two Jokers. Two or more but preferably seven players may participate in the game; one of the players is the Banker whom other players play against; a Player who is not a Banker may play Poker Bet playing against the Banker's hand, and/or one to seven side bets betting on the contents of the Player's own hand. After at least one wager is placed, each Player and the Banker are each dealt six cards; the Players and the Banker each then selects and keeps his best 5-card poker hand from his six cards and discards one card. To win a Poker Bet wager, a Player's best 5-card poker hand must rank higher than the Banker's best 5-card poker hand. To wins a side-bet wager, a Player's best 5-card poker hand must be one of the predetermined winning hands of the type of the side bet he bets on. The Poker Bet wager and seven side-bet wagers are eight independent wagers and are settled separately.
